### **Claim Rejections – 35 U.S.C. 101**

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-23 are rejected.

The disclosed invention is inoperative and therefore lacks utility.

In claims 1, 2, 5, 6, 14, 15, 20, the claimed invention is inoperative because the limitation fails to show that whether the method can generate indicia maps and provide indication if the objects do not have the corresponding annotations.

In claim 8, the claimed invention is inoperative because the limitation fails to show the condition if a specified result set of the query does include primary key data.
